CAREER OBJECTIVE

Computer Science and Engineering (Data Science) student with hands-on full-stack development internship experience and project work in web development. Seeking an entry-level software development opportunity to apply programming, problem-solving and database skills while contributing to practical software solutions.

EDUCATION

New Horizon College of Engineering, Bengaluru — B.E., Computer Science & Engineering (Data Science)

Expected Graduation: 2027 | Relevant Coursework: Data Structures & Algorithms, OOP, Java, DBMS

SJES Polytechnic, K. R. Puram, Bengaluru — Diploma in Computer Science | 2024

TECHNICAL SKILLS

Programming: Python, Java, C, JavaScript, PHP | **Web:** HTML5, CSS3, React.js

Database: MySQL, SQL | **Core CS:** DSA, OOP, DBMS, SDLC

Development: Frontend, Backend, REST APIs, Debugging & Testing | **Tools:** Git, GitHub, Jira, Agile/Scrum

EXPERIENCE

Full-Stack Development Intern — JB Portals, Bengaluru | January 2024 – April 2024

- Developed and enhanced web application features based on user stories and client requirements.
- Contributed to frontend and backend development using HTML, CSS, JavaScript, PHP and MySQL.
- Implemented database-driven functionality and supported frontend-backend integration.
- Tested and debugged applications to improve functionality and reliability.
- Participated in Agile stand-ups, task tracking and project documentation using Jira.

PROJECTS

Student Mentoring Platform — Main Project

React.js, JavaScript, HTML, CSS, AI/Agentic AI Concepts

- Developed a student-focused platform for academic progress, personalized guidance and career development.
- Built dashboards and interactive modules for performance, AI insights, goals, learning activities and mentor support.
- Designed AI insights covering academic performance, learning consistency, cognitive readiness, career readiness and areas needing attention.
- Integrated an Agentic AI concept with agents for academic analysis, learning support, risk prediction, career guidance, mentoring and goal assistance.
- Developed mentor interaction concepts for text, audio and video communication.

Crop Plantation E-Commerce Website — HTML, CSS, PHP, MySQL

- Developed a crop-focused e-commerce website with crop cards, shopping cart functionality, a crop calendar and database-driven product information.

Mini Calculator — C

- Developed a command-line calculator for basic arithmetic using switch-case logic and division-by-zero handling.

ACHIEVEMENT & CERTIFICATIONS

Achievement: First Prize, Figma Design Competition, KS Polytechnic (2024).

Certifications: Full-Stack Development Internship Certificate | NPTEL – Internet of Things (IoT) | IIT Bombay – Python 3.0 Certification
